

PLANT POWER[®]

Boost Your Plants!

CORN

CORN

COTTON

Plant Power is a true **'Biostimulant'**, designed to enhance root development, crop vigor, growth and development; the result is **'Higher Protein Content'** in **Wildlife Food Plots**.

Recommended Methods of Application

Plant Power may be applied to young seedling food plots as a foliar spray at a broadcast rate of 32 Oz. per acre. **For best results**, make an application after the first two true leaves has developed and follow with a second application two to three weeks later. Apply with enough water for ample coverage (5 gallons total). **May be applied with glyphosate.** *Plant Power* is effective on ALL plants. **Pump-Up Sprayer:** Dilute NO MORE than two ounces in each gallon of water and spray a fine mist from a distance of three feet over native vegetation or individual garden or pot plants. Apply NO MORE THAN once per week.

Plant Power Liquid Concentrate is available in 32 Oz. Bottles, six (6) per case; or 2.5 x 2 (5 Gal)
